

## Stylish Nurseries

Hey everyone, Single Stone Studios is back with more decals. Last month's article was a great success, thanks so much to all of you who read it!

This month I want to share some fun ways to use decals. We get so many fun photos back from our customers. They are truly my favorite part of doing what I do. Seeing your completed projects is absolutely the BEST!

I am asked on a daily basis to help choose a design, colors, or to custom size a decal for nurseries. So much fun for me! I love to decorate any room but nurseries are just so special. Here are a few photos from our customers who did a fantastic job incorporating our decals into their room design. All of these decals were installed by our customers – even the large sizes! It's a really simple process.

This first design is our Cherry Blossom Branch. It's used in so many different ways but we absolutely loved it in this nursery. Gorgeous!

Our Whimsical Tree design is definitely a nursery favorite. From the canopy of branches to the sweet birdies chirping a lullaby (ok you have to imagine the chirping) this design adds lots of color and whimsy to the room.

Don't have a wall for a large scale design? Text is a great way to add a special accent to a smaller space, like over a dresser. Our Twinkle Twinkle design was just right for this gender neutral design.

And last but not least, our Pirate's Life decal in a boy's nursery. I love the crisp white decal on that navy blue wall. Nautical perfection!

If you do a project with our decals, please, send us a photo! We love getting them and we add them to our Customer Gallery on our Facebook page.

Shelley
